

Your labor model should reflect your factory. Not a spreadsheet.

CalcuQuote meets your labor costing process where it is today and helps it mature toward greater accuracy, consistency, capacity visibility, and margin control.

Establish

- Rule of Thumb
- Excel-based estimates
- Speed over precision

Organize

- Defined activities & drivers
- Standard inputs
- Repeatable estimates

Optimize

- Actuals-driven refinement
- Closed-loop improvement
- Predictive labor + cost

Transform

- Operations & routings
- Bottlenecks + cycle-time
- Utilization + FTE visibility
