

## NEW PROJECT

# AURICCHIO

### The Company

The **GRUPPO AURICCHIO**, a world leader in *Provolone* cheese production and among the leading producers of the finest Italian traditional cheeses, operates in eight production plants in Italy and two trading companies, with one in the United States and one in Spain. The company produces and manages some of Italy's most internationally known dairy brands: Auricchio, Riserva Esclusiva Auricchio, Locatelli (for the U.S.), Giovanni Colombo, Ceccardi, La Pecorella, Cascine Emiliane, Gloria, Caseificio Villa and Caseificio Giordano. In 2021, the Group's turnover was about 320 million euros, 50 % of which was generated in foreign countries. Exports reach 60 countries including North and South America, Australia, Europe, the United Arab Emirates and the Far East.

For more information, visit [www.auricchio.it/en/](http://www.auricchio.it/en/)

### The Project

The solution proposed by **i2Lab** is based on the **Analytics** and **Shop Floor Monitor** modules of the **sedApta Suite**. Specific **Printing** functionalities of the **SFM module** have been reworked to meet the needs of product marking as well as label generation and printing. The objectives of the solution are:

- Streamline production identification
- Ensure declaration and validation of materials used
- Improve label layouts
- Optimize the integration of printing and marking equipment
- Integrate interchange between weighing and automation systems
- Streamline and optimize product traceability
- Reduce low value-added manual operations

Through **Analytics**, a sedApta Business Intelligence platform, dashboards will be provided to monitor production trends. Through this interface, supervisors and department managers will be able to have faster and more complete control of what is happening on the lines facilitating optimization of reaction processes.

The proposed solution will be implemented so it can evolve on further production areas.

### Why i2Lab?

**i2Lab, company of the sedApta Group, was selected by Auricchio as its Technology Partner** due to its many years of experience in vertical solutions specifically for the Food&Beverage market.

*"At i2lab, company of the sedApta Group, we found a partner with the proactive experience we needed. The company has been able to bring us excellent technological solutions that will allow us not to waste time and resources. Having the right information at our disposal will enable us to operate with greater speed and flexibility, thus responding to the ever-increasing needs of a changing market. What proposed by i2Lab are End-to-End modular solutions that will be able to support us in our growth in an effective and sustainable way."* says **Lodovico Auricchio**, Project Manager for the Gruppo Auricchio.

Alberto Costanzo, CEO i2Lab, affirms, *"The collaboration with Auricchio, proves the worthiness of the sedApta solutions for the Food&Beverage market. Thanks to the long-standing experience of the i2Lab team in the industry, we are confident that we are the ideal partner for Auricchio in this journey of digital transformation of its factories."*
